Ms Gia Polio  
Director of Sales Eastern US and Canada  
Cooper Surgical  
75 Corporate Dr,  
Trumbull, CT 06611

September 20, 2018

Dear Ms. Polio,

Please find enclosed a copy of my resume in response to the position of Biomedical/Mechanical Project Engineer II as advertised on LinkedIn. I am currently in my final year of my Master's degree in Biomedical Engineering at The City College of New York and will be graduating in June 2019.

I have been involved in numerous large-scale testings and releases of biomedical products, particularly related to electrosurgery devices. Over the course of my career as a biomedical engineer I have taught over a dozen seminars on biomedical ethics and strategies for efficiency, increased team efficiency by implementing new techniques for testing equipment, and led the development of two successful electrosurgery devices.

Because of my experience, I understand the importance of time management and open communication. While it may be easy to focus on the technical side of work, I have found that being able to express concerns, roadblocks, and alternative solutions to colleagues of varying technical backgrounds has been invaluable in my professional development. For example, I helped the pharmaceutical company VINH PHUC to develop their packaging from design to production.

As you can see from my resume, my academic and extracurricular activities have given me the capacity and confidence to work with people from a variety of social backgrounds. My ability to work under pressure has been illustrated by my handling of the requirement to study and to juggle domestic responsibilities efficiently. I believe that through the research for my dissertation I have shown myself to be capable of organizing my time effectively and using my initiative to come up with original ideas.

I truly believe in continued education and research, and continue to seek new methods to assist with safe, effective product development. I hope to bring my knowledge, and future knowledge, to your organization.

I look forward to speaking with you more about this opportunity. Thank you so much for your consideration of my application.

Sincerely,

Younes Zerhouni
